## DESCRIPTION

Having a strong interest in new technologies, I am always looking for innovation in my solutions. My experience has given me the opportunity to familiarize myself with a broad spectrum of skills, in both design, programming and management with a specialised focus on VR/AR.

As a person I am friendly, social and keen to lighten the mood with a joke. In stressful situations or deadlines I know how to keep my calm, stay focussed and motivate my teammembers.

I often spend time with coworkers outside working hours to strengthen our relationship, be it going for a beer or playing video games together.

## EXPERIENCE

### **Crowbar Studios, Schagen**— *Chief Technology Officer*

SEPTEMBER 2018 - JUNE 2019

Leading a team of specialized developers in the creation of high-end VR solutions while also providing art direction, and project organisation.
